## MED.IC™ RFID Smart Cabinet Enabling Automated Inventory Control

MED.IC delivers a breakthrough in asset visibility, security, and automated inventory management. MED.IC uses on-demand sensing to identify items removed or added to the cabinet, while transactions are automatically associated to the user. MED.IC provides fast, auto-inventory functionality for reliable management of your valuable medical assets.

### Reliable and Secure Inventory Control

- Automatic check in/out provides 100% accountability
- Quickly scans hundreds of tagged items simultaneously
- E-mail notification of “out of stock” or “low stock” inventory
- Auto-notification of an item’s expiration, calibration date, etc.
- Reduces inventory shrinkage and obsolescence
- Improves product regulatory surveillance

### Comprehensive Versatility

- Allows data synchronization between multiple MED.IC cabinets and existing company inventory systems
- Web-based browser for remote inventory monitoring and reporting
- Secured accessibility using access code, fingerprint, or smart pass
- Easy-to-use touch screen interface
- Customized configurations also available

Let us show you how MED.IC smart cabinet technology provides secure and accurate inventory control of your valuable medical assets to help you achieve maximum profits and competitive advantages. Call us directly at 260-399-1641 or visit us on the web at [www.solsticemedical.com](http://www.solsticemedical.com).
